M'ERIC MINERALS
1 Discovery at a Time

MINING CONSULTING
AND PROJECT DEVELOPMENT

We deliver complete advisory solutions to mining projects, from concept to operation We combine modern technologies such as 3D mine planning, geospatial analysis, and predictive maintenance systems to deliver measurable results and safer mining operations.

01 Mine design, planning, and scheduling (open-pit and underground)

02 Production audits and optimization studies

03 Equipment selection, fleet management, and cost efficiency modeling

04 Mine infrastructure design (haul roads, drainage, workshops, etc.)

05 Slope stability analysis and pit optimization

06 Technical supervision and operations management

07 Mine safety assessments and risk prevention systems

08 Strategic mine closure and reclamation planning
