GEOLOGICAL
AND EXPLORATION SERVICES

We offer a world-class geological expertise for mineral exploration, resource estimation, and deposit evaluation. We use advanced software to interpret geological data and support exploration decisions.

01 Regional and detailed geological mapping

02 Lithological, structural, and alteration studies

03 Mineral identification and petrographic analysis

04 Core logging, trenching, and pitting supervision

05 Sampling protocols and QA/QC management

06 Mineral resource modeling and estimation (JORC, NI 43-101, SAMREC compliant)

07 Geostatistical analysis and block modeling

08 Target generation and exploration strategy development
