INFRASTRUCTURE
AND CIVIL WORKS ADVISORY

Mining requires reliable infrastructure, we provide engineering design and planning for mine-related infrastructure. We ensure engineering designs meet both operational needs and environmental safety standards.

01 Road and drainage design for mine access

02 Quarry and aggregate production management

03 Concrete works (culverts, bridges, masonry units)

04 Water supply and stormwater systems

05 Energy systems (diesel, solar, hybrid)

06 Site layout and camp design
