DRILLING
AND SAMPLING MANAGEMENT

Our team manages and supervises all forms of drilling programs, ensuring technical integrity and cost control. We ensure data credibility for accurate resource estimation and project valuation.

01 Reverse circulation (RC), diamond core, and auger drilling programs

02 Borehole logging and downhole surveying

03 Core recovery assessment and geotechnical data collection

04 Drillhole database management and validation

05 QA/QC implementation (duplicate, blank, and standard monitoring)

06 Laboratory result validation and reporting
