

INVESTMENT, FINANCE
AND MINERAL ECONOMICS

Our investment and mineral economics department helps clients assess, finance, and manage mining investments profitably. We assist investors, banks, and institutions to make informed, risk-balanced mining investment decisions.

01 Economic evaluation and cash flow modeling

02 Discounted Cash Flow (DCF) and Net Present Value (NPV) analysis

03 Project finance and bankable feasibility studies

04 Commodity market analysis and price forecasting

05 Investment risk analysis and sensitivity testing

06 Mine valuation, acquisition, and due diligence studies

07 Strategic planning and business development support
