REMOTE SENSING, GIS
AND DATA ANALYTICS

We apply digital technologies to revolutionize exploration and mine management.
We offer DroneDeploy for advanced LiDAR spatial analysis.

01 Satellite imagery interpretation and lineament mapping

02 GIS database development and spatial data management

03 Digital terrain modeling (DTM) and topographic mapping

04 Remote monitoring of mining activities using drones

05 Geospatial integration with geological and geochemical data

06 Predictive modeling for mineral prospectivity
